- Review and Accept the conditions that The University of Tulsa will be able to sign you into our environment using your Microsoft credentials and that The University of Tulsa will be able to see the name, email address, and photo corresponding to that Microsoft account.

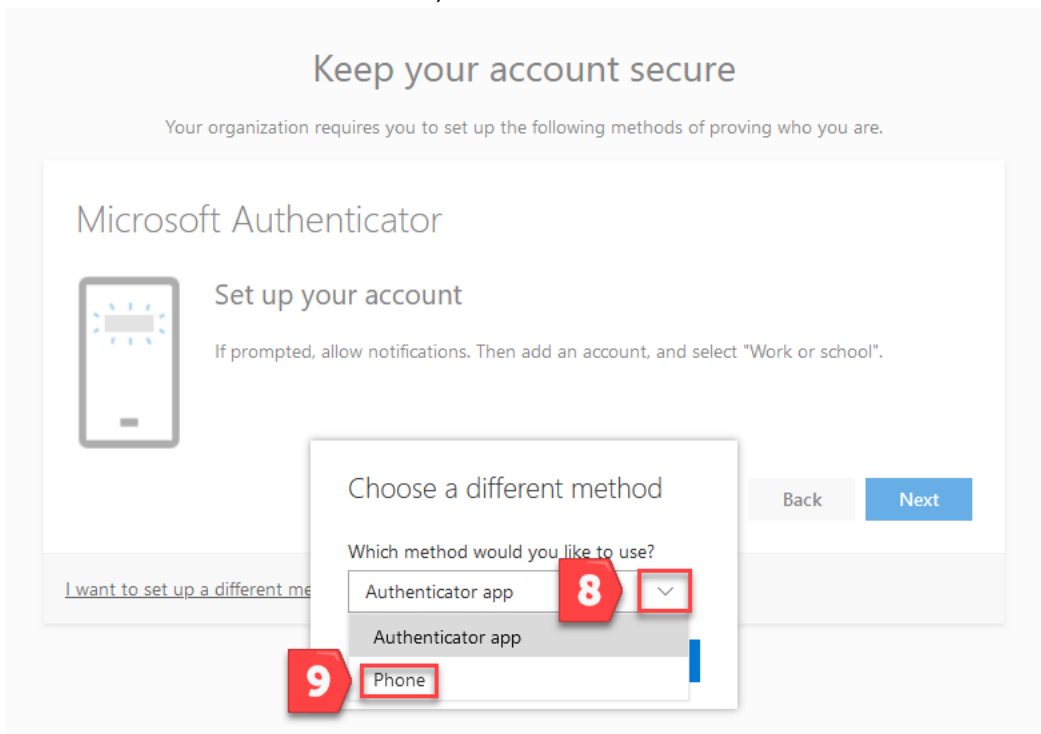

- The University of Tulsa requires multi-factor authentication. Click the "Next" button to begin this process.

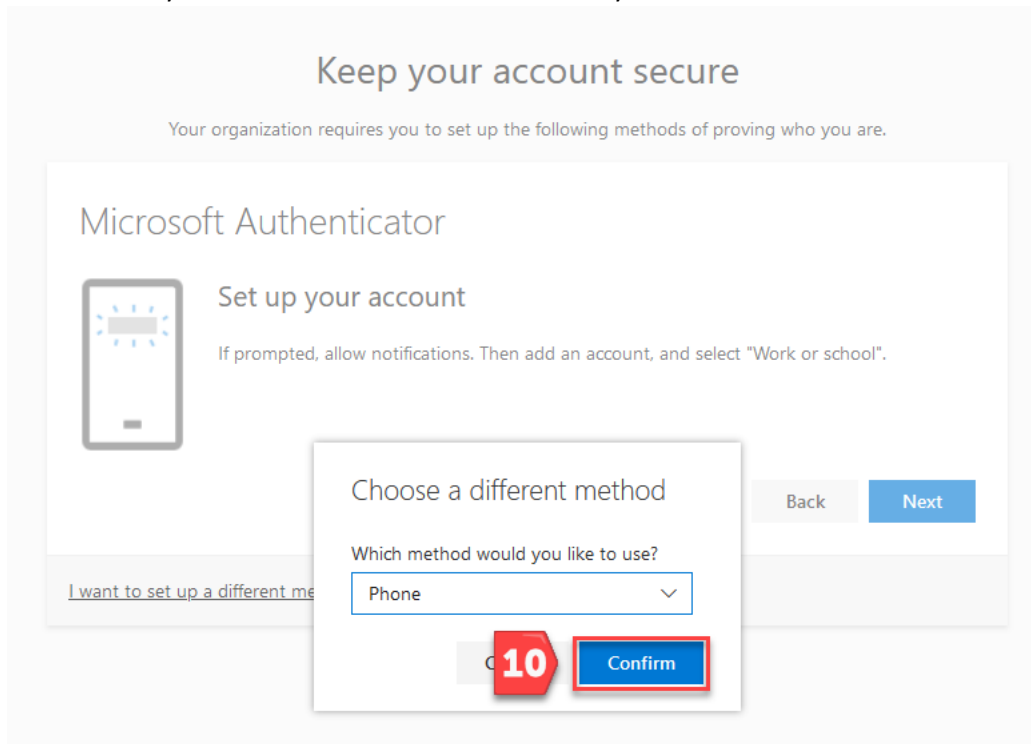

7. If you already use the Microsoft Authenticator app or you would like to download and use it, continue using the “Next” button and these instructions: [Multi-Factor Authentication - IT Help \(utulsa.edu\)](https://utulsa.edu/it/help/multi-factor-authentication). **You do not have to download Microsoft Authenticator. If you prefer to set up a different method such as an SMS text to your phone, click the “I want to set up a different method” link.**

8. Select the dropdown on the “Choose a different method” screen.
9. As an alternative to Microsoft Authenticator, select “Phone”.

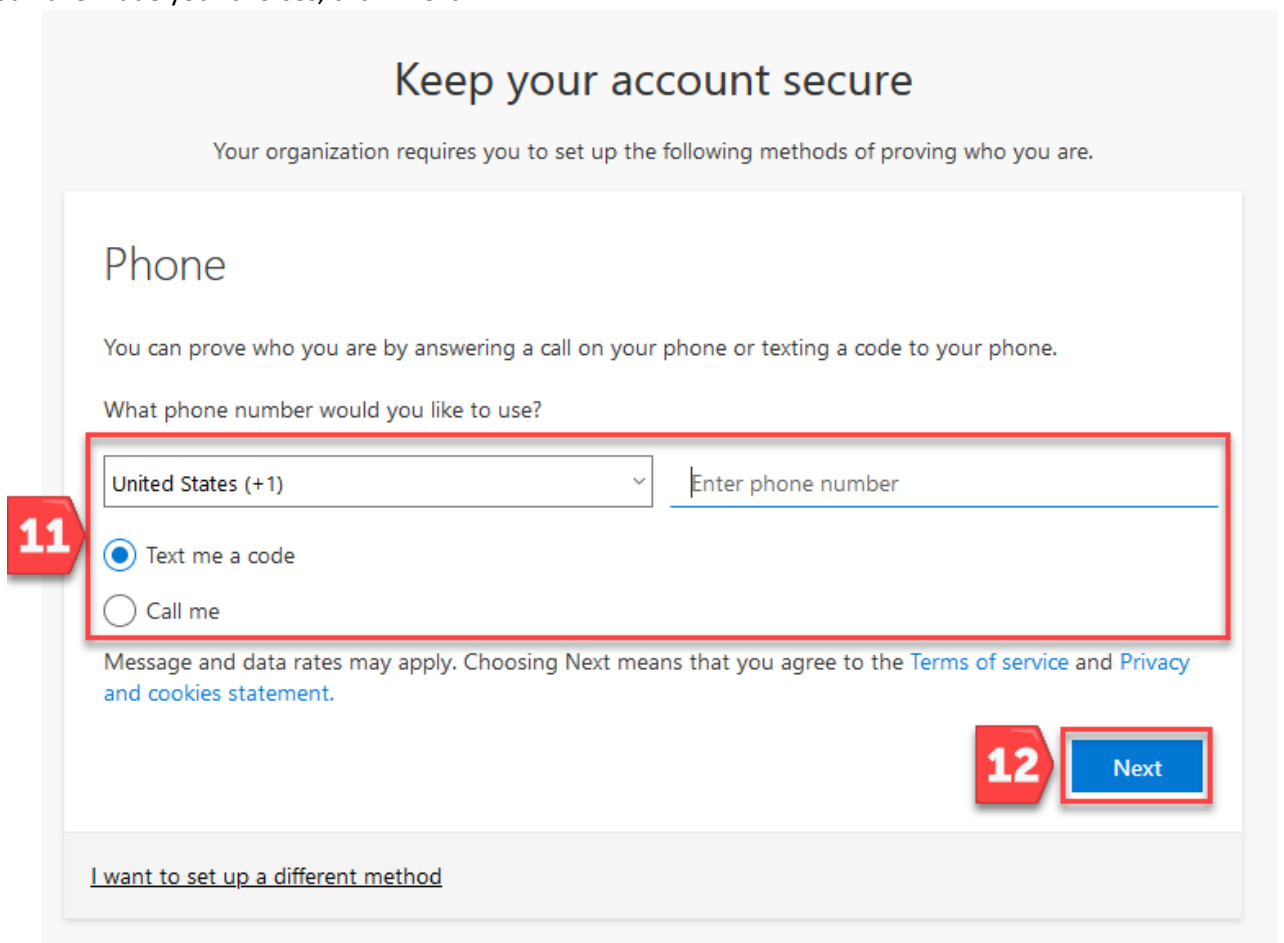

10. Click "Confirm" once you have Phone listed as the method you would like to use.

11. Enter your phone information and decide whether you would like a code texted to your phone or a phone call to authenticate.

12. Once you have made your choices, click "Next"

13. A verification text or phone call will complete the process.
